senses[®]
absolute wood experience

There is nothing in the intellect that was not first in the senses.

Aristotle

Welcome to the new dimension

The most characteristic features of the floors from the SENSES collection are their dimensions. Greater than a standard width of the board (207 mm), this has been additionally emphasised by bevelling along the edges. The effect is rounded off by the 3.2 mm thick surface layer of oak. Thanks to the floor's cross structure it can be used over underfloor heating. The floor is easy to care for and keep clean.

Latest trends

Create and express yourself! What matters now is your attitude - to life and the world, to form and space. Express it in your interior. Let it be as unique as a fingerprint. Individual as a DNA code. Yours. Experiment, break moulds, play with convention. Create.

Purity of form

The limited number of forms and textures creates a luxury interior with a transparent and well-arranged character. Wooden wall cladding stylishly harmonises with a carefully selected floorboard. The interior's distinctiveness is strongly accentuated by a designer construction column.

An enduring classic

Where lies the strength of a classic? In its timelessness. Its harmony and order. Its multidimensionality. In its exceptional ability to adapt to any time or context.

Just like classic music or literature, traditional decorative solutions also constitute the essential nature of their genre and an endless source of inspiration for contemporary arrangements. This is why materials such as natural wood, marble or brass invariably make an interior elegant and sophisticated.

Big size 207

The fine noble product, which is a larger than a standard sized wooden board with a natural finish, is perfectly matched to an interior where modernism and elegance are what matters.

The wide range of colour schemes and finishes in matt lacquers and natural oils bring out the true beauty of wood.

Arranging a minimalist interior requires great skill in working with forms and colours. A sparse style of arrangement emphasises the lightness and spaciousness of a room and displays the floor – the brushed and subtly whitened GENTLE oak.

GENTLE

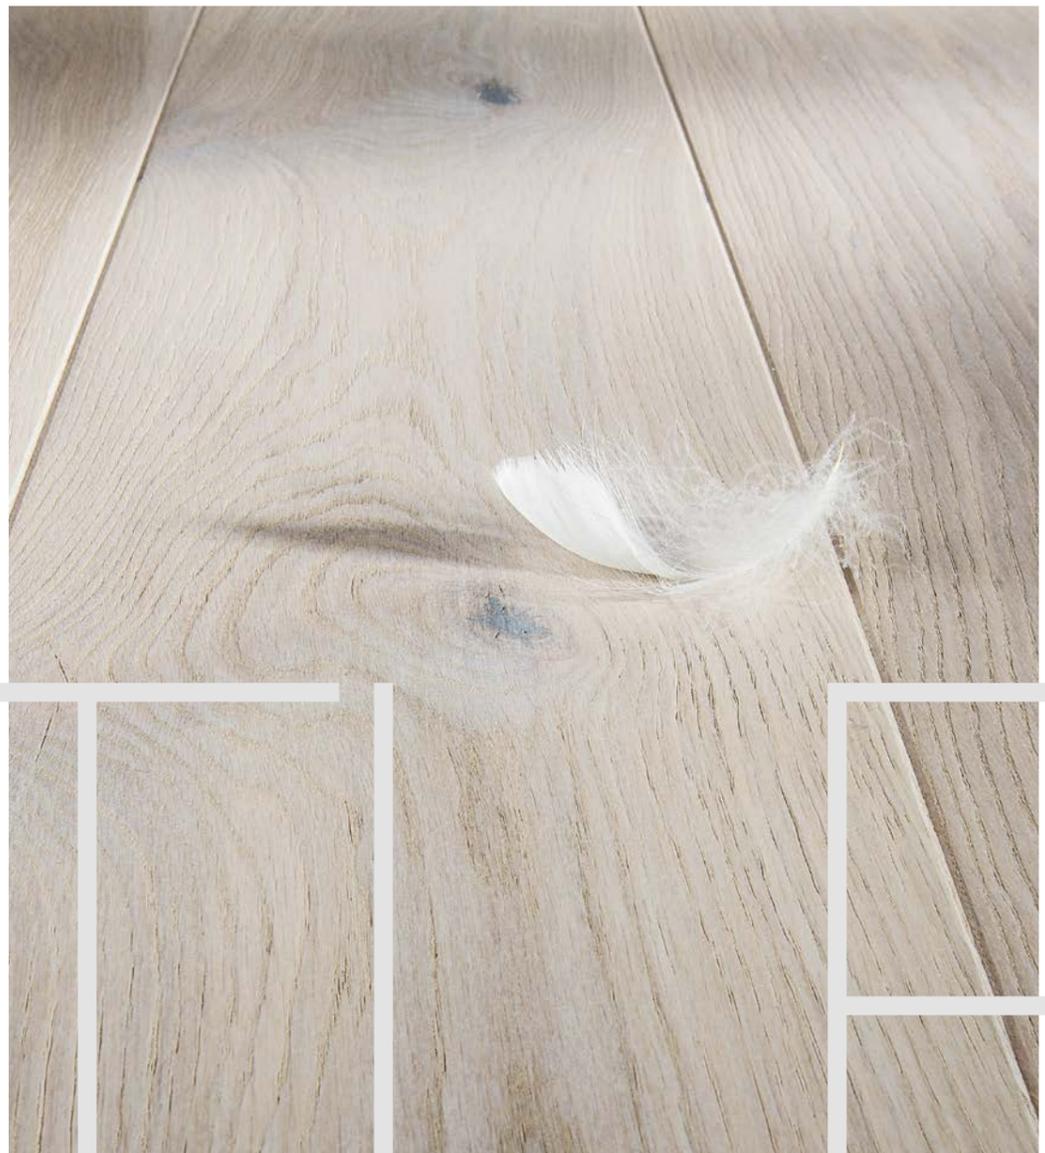

An interior based on harmony and the intertwining of vertical and horizontal planes. The headboard crowning the bed frame becomes an extension of the boards used in the interior, which increases their power of expression.

GENTLE

P6101312A – GENTLE Oak skirting board

An interior which leaves nobody indifferent. Painstakingly selected finishing materials, imaginative colour schemes and refined glamorous accessories. The subtle oak floor TOUCH brings lightness to an arrangement.

TOUCH

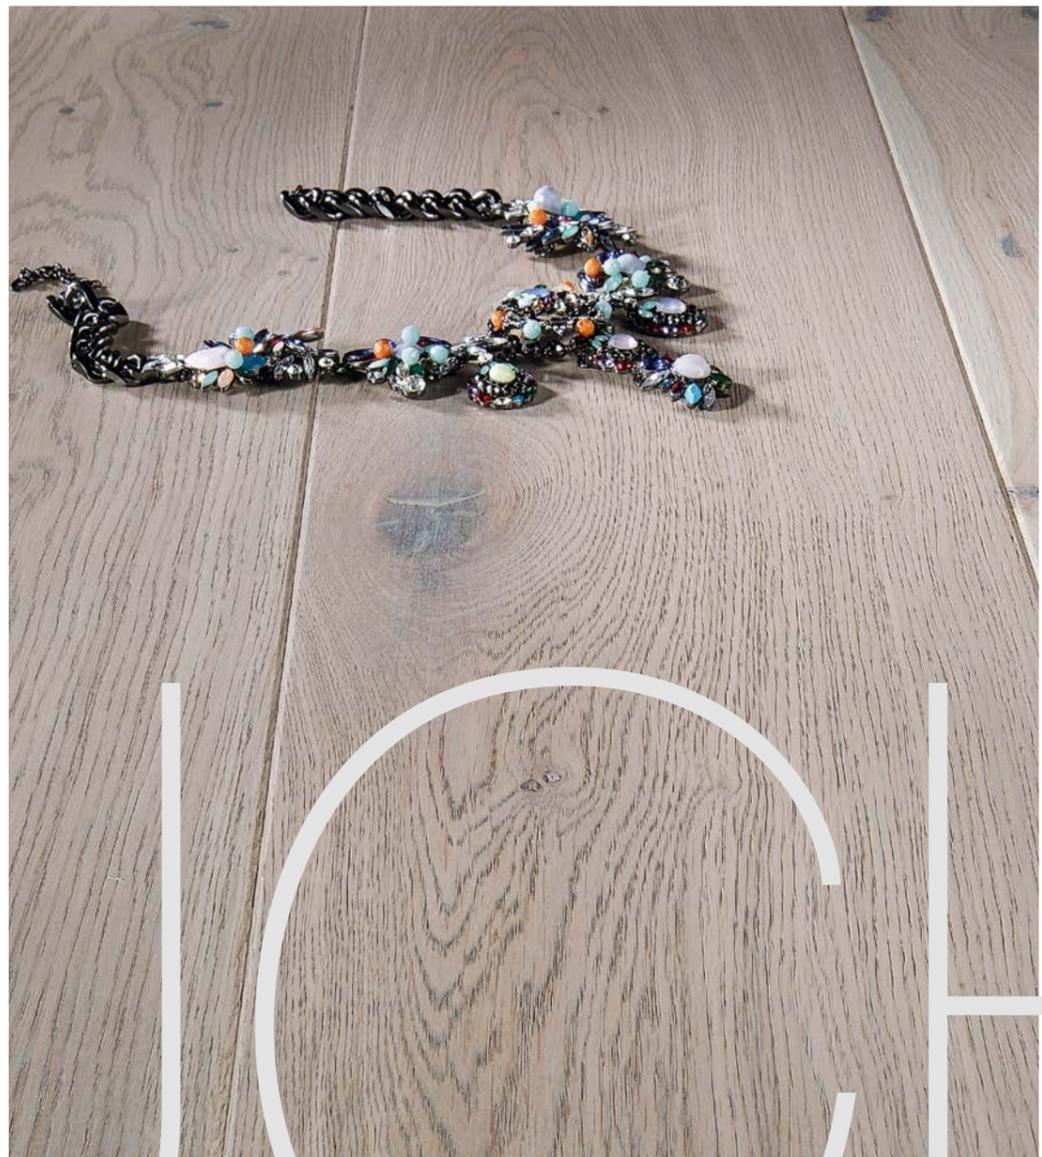

Sophisticated, luxurious furniture and decorative elements need an exceptional background. A floor with a subtle, light colour lightens up an interior, excellently supplementing and bringing out the Parisian spirit of its design.

TOUCH

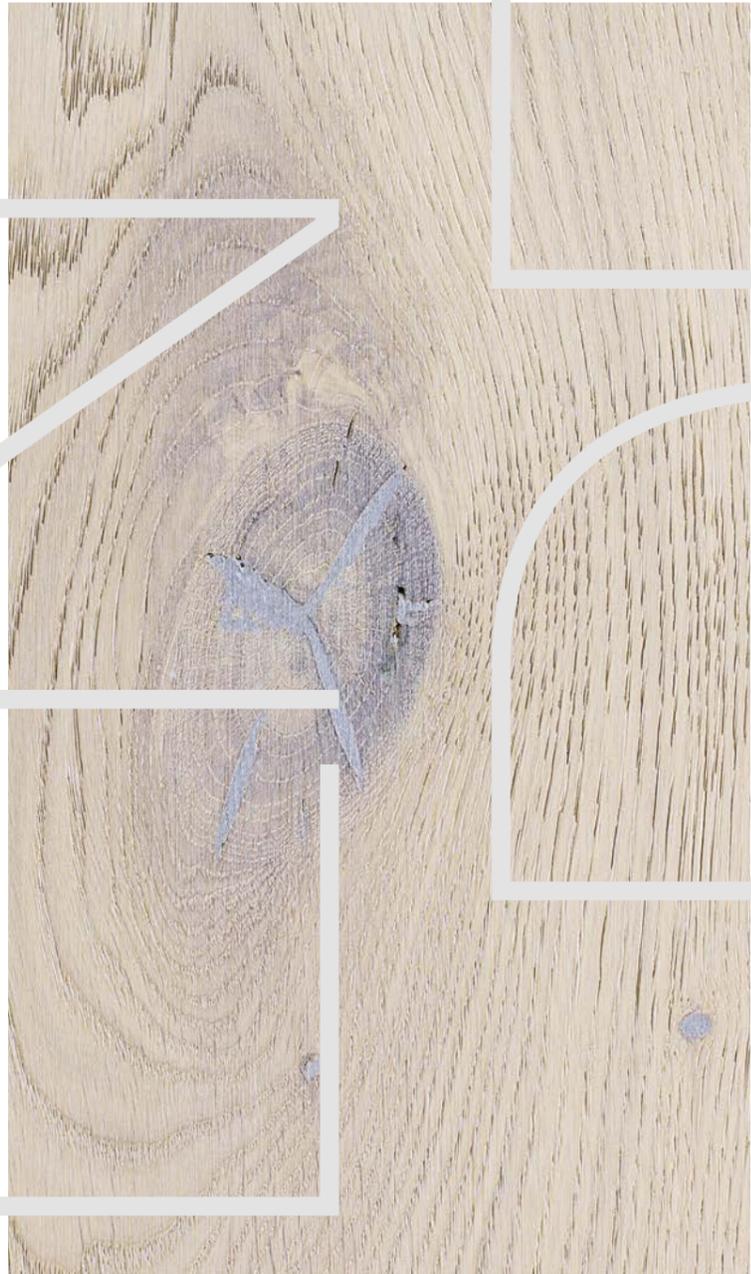

P6101242A – TOUCH Oak skirting board

An interior which is the essence of a simple take on elegance, showing its creator's particular attention to detail. The wall, finished with ceramic, has become a background which encases a television and displays a picture which blends in elegantly. The palette of colours works perfectly with the TENDER oak board.

TENDER

The floor's ideal plane does not compete with the dramatism of the individual elements in the arrangement, but helps bring out their unconventional nature. The exceptional width of the boards is emphasised by the clearly marked edges, and the wood's natural warmth calms and harmonises the arrangement.

TENDER

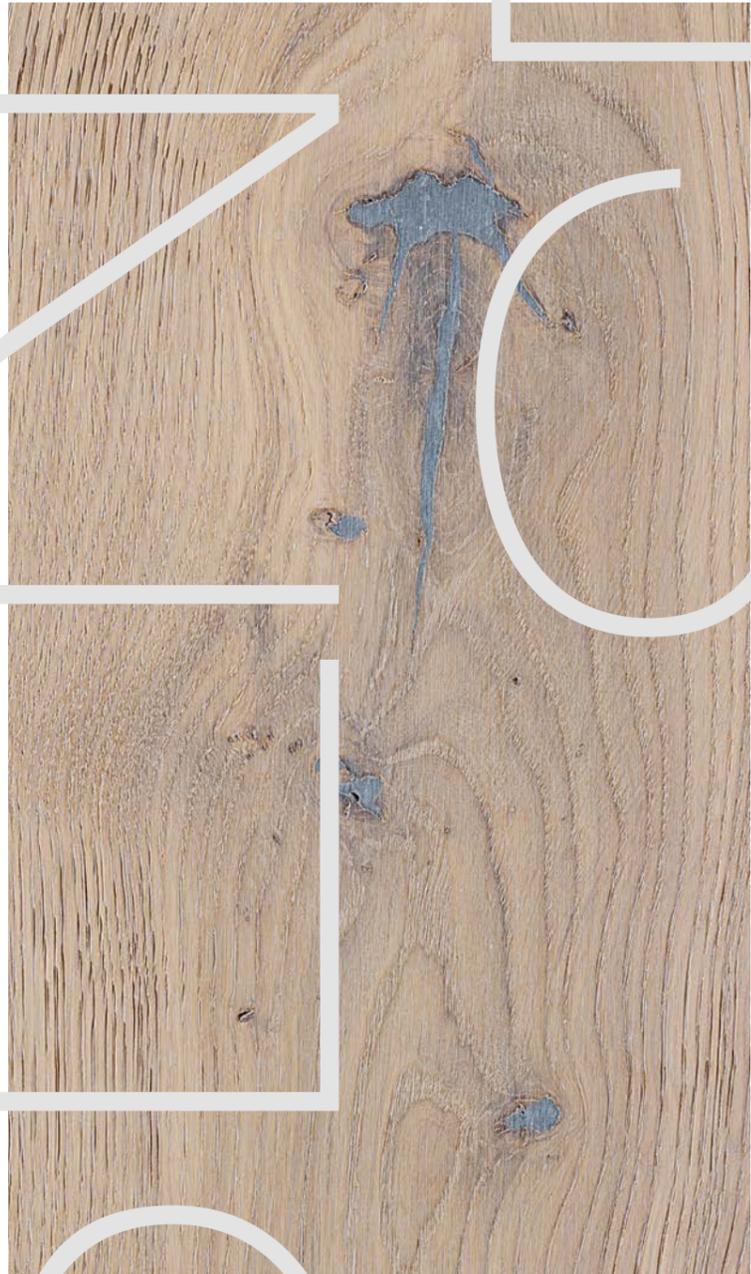

P6101352A – TENDER Oak skirting board

The forms and materials suggested by the designer make this interior very distinctive and full of character, despite its modest colour scheme. The use of industrial elements, recycled wood, cork and black elements on the walls, makes for an expressive mix, which is perfectly toned down by the subtle company of the SENSE flooring.

SENSE

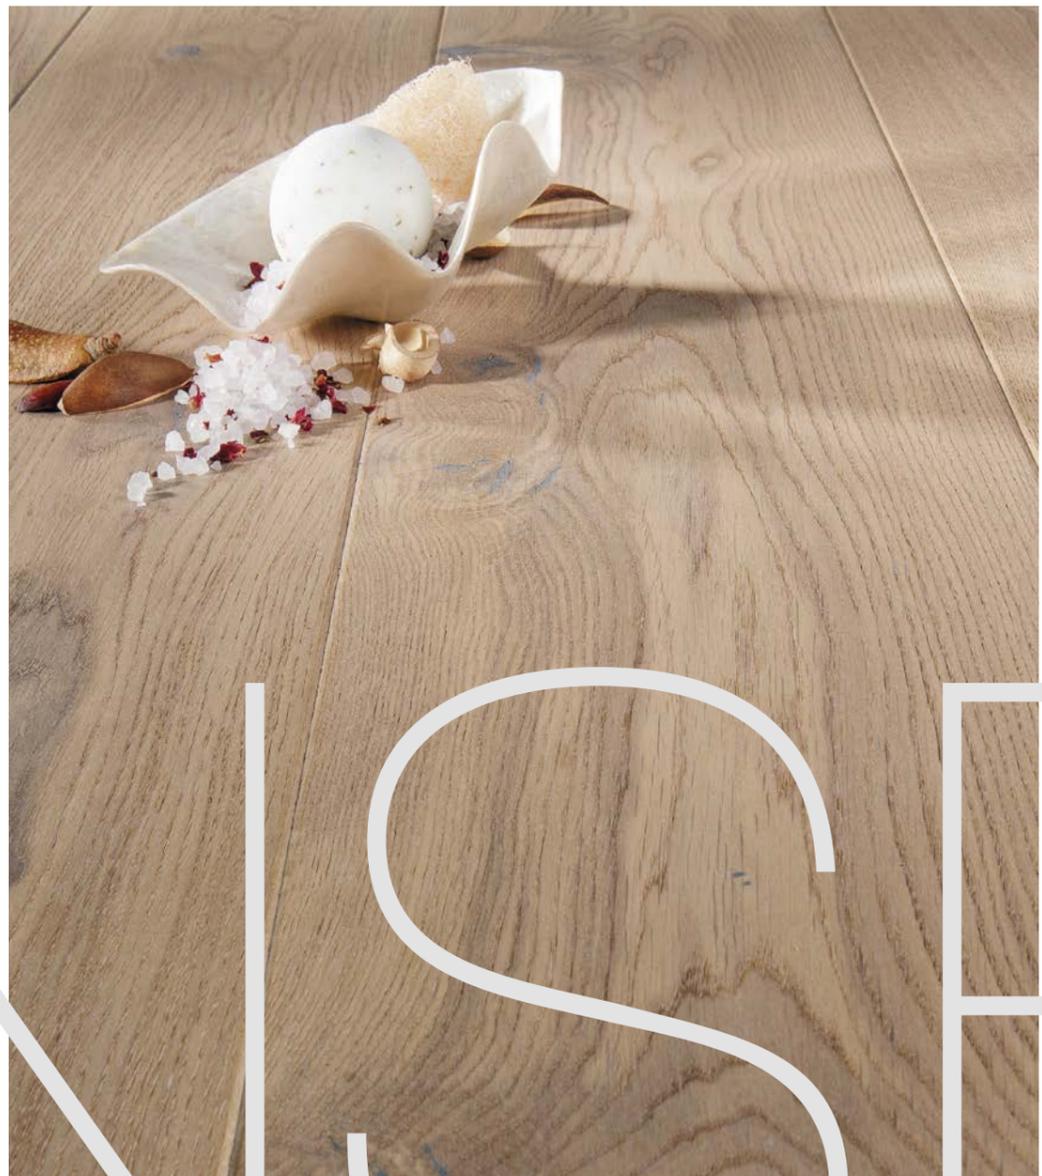

This impressive loft-style interior has been designed with a tinge of nonchalance. The custom furniture was inspired by the idea of the creative use of industrial materials. In opposition to it there is a leather armchair and the highest-quality SENSE wood floor.

SENSE

P6101332A – SENSE Oak skirting board

SENSES

The modern interior of this stylish penthouse has been enhanced with timeless solutions and materials. The modernist kitchen furnishings are contrasted with a marble island, and the spectacular aluminium windows provide abundant illumination for the DELIGHT wood floor.

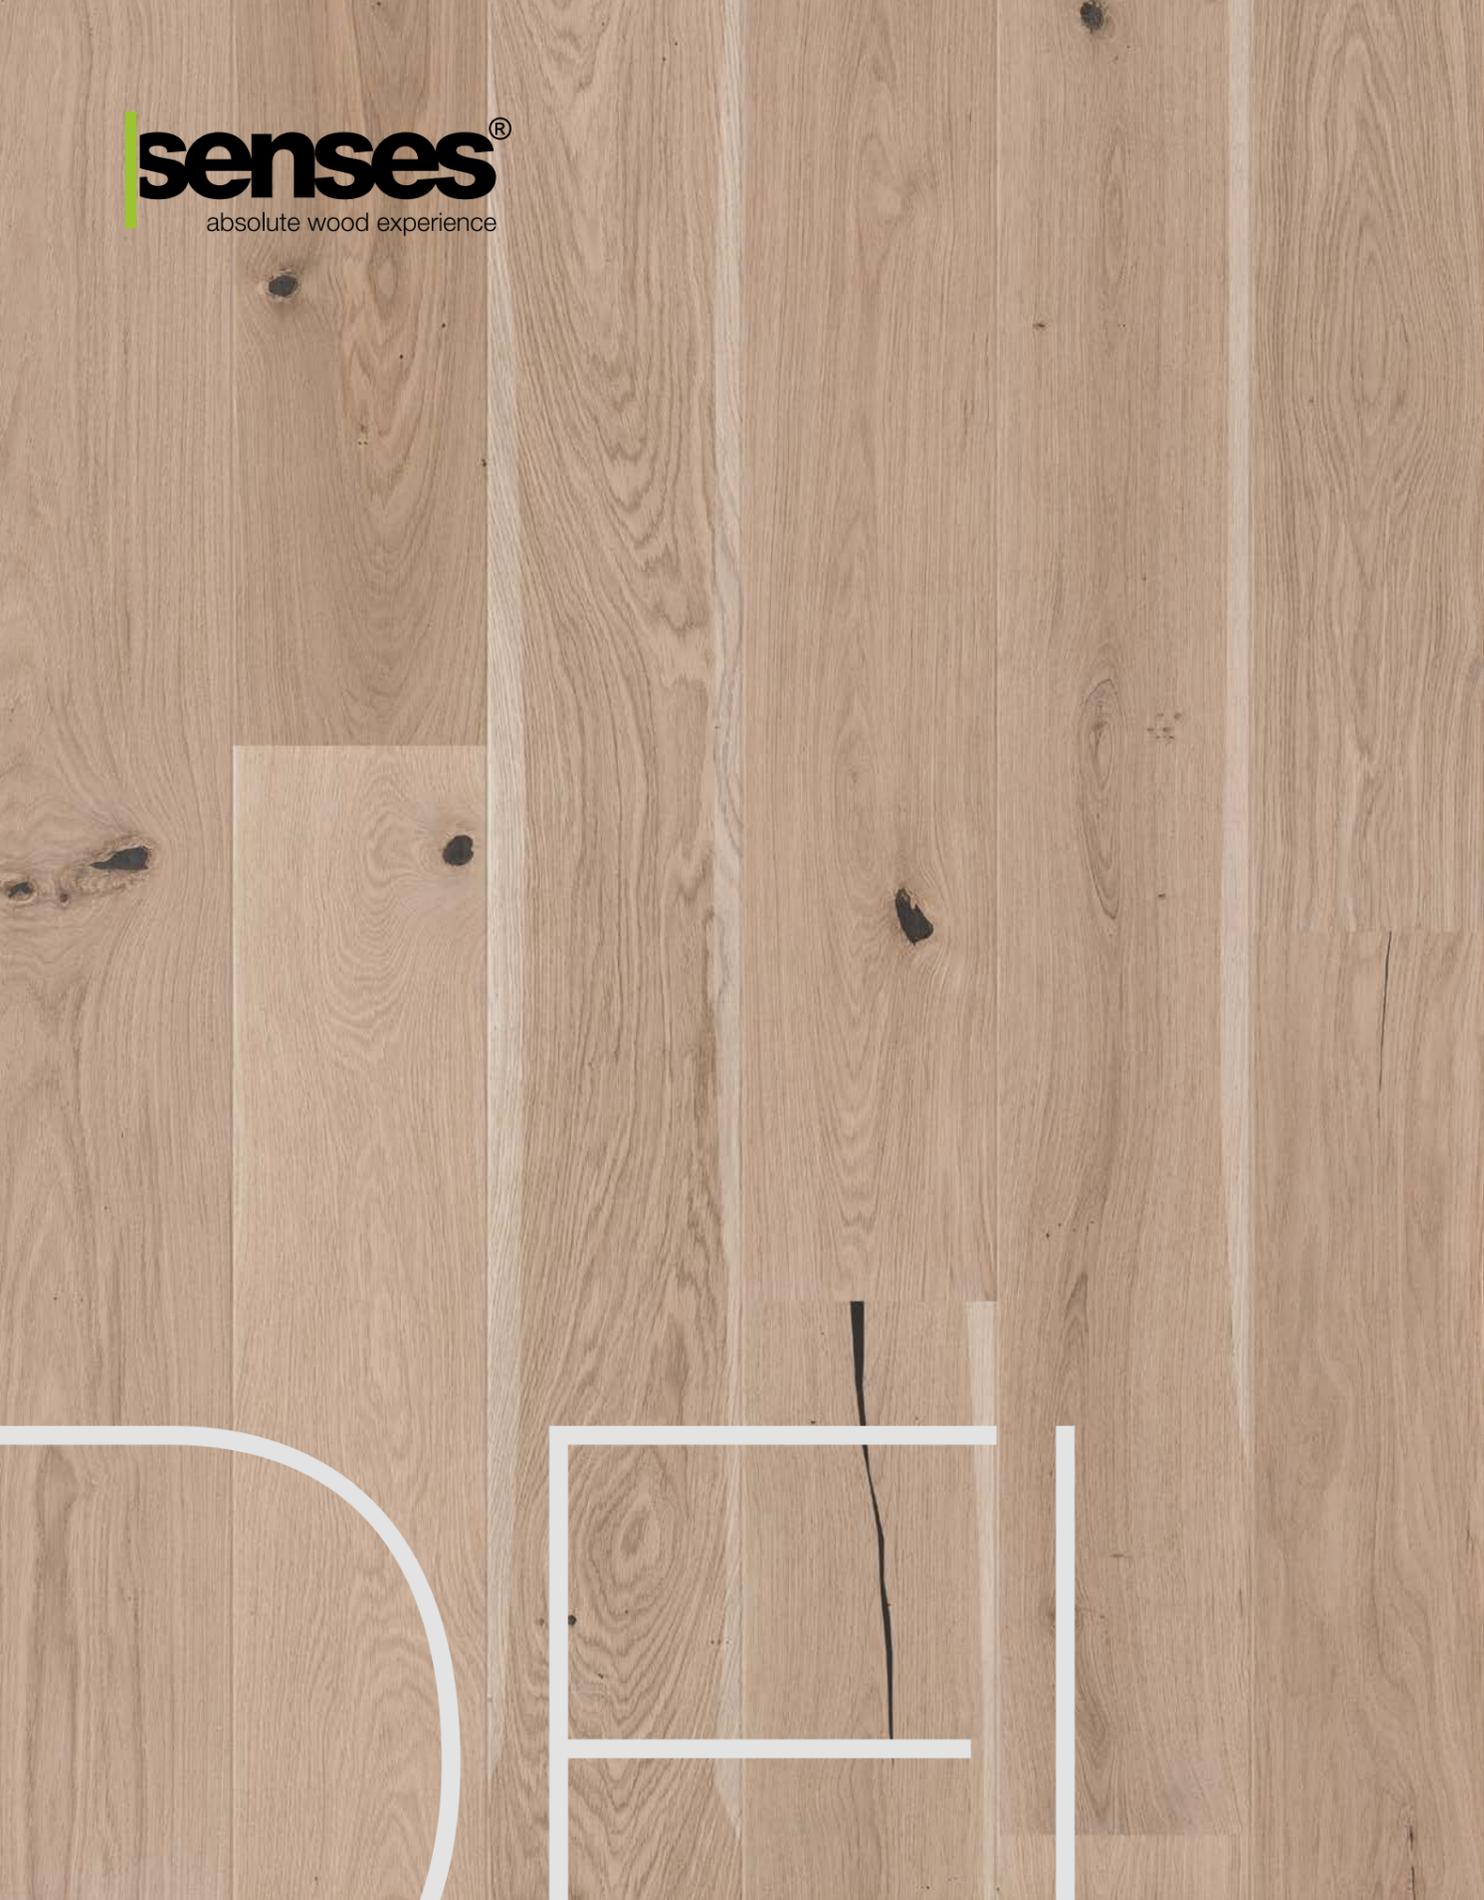

DELIGHT

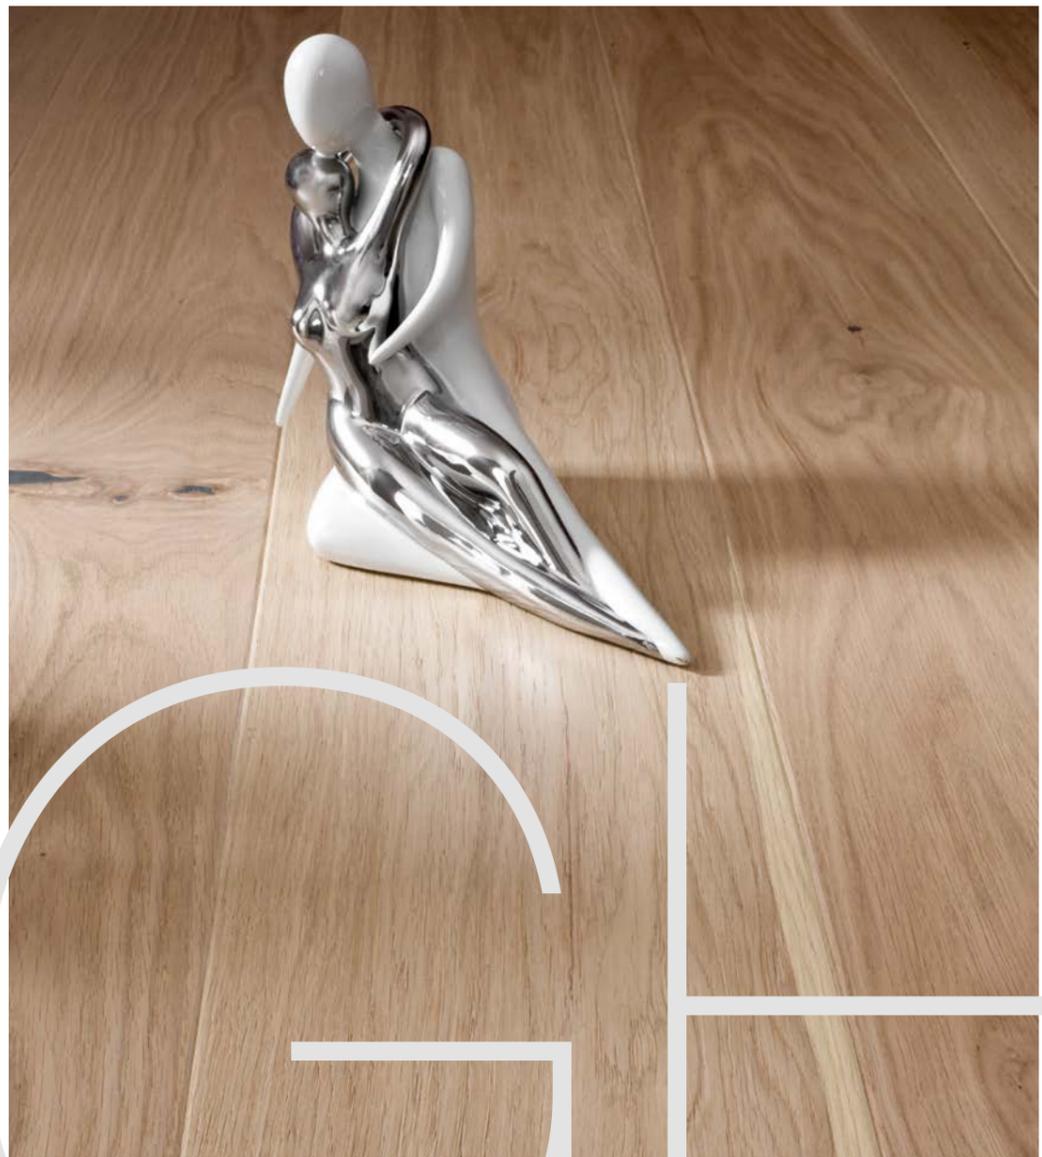

The harmonious interplay of forms and planes creates a perfect venue for relaxation. The futuristic chandelier and the large windows enhance the sense of space, adding air to the composition. The sophisticated cool of the design is contrasted by the warm shade of the Delight wood floor.

DELIGHT

Original stylish elements take on a new dimension in this interior, so that the arrangement as a whole personifies a new dimension of the classic. The light spaces and inspirations drawn from London residences are in perfect harmony with the classically elegant HARMONY oak floor.

A
R
N

HARMONY

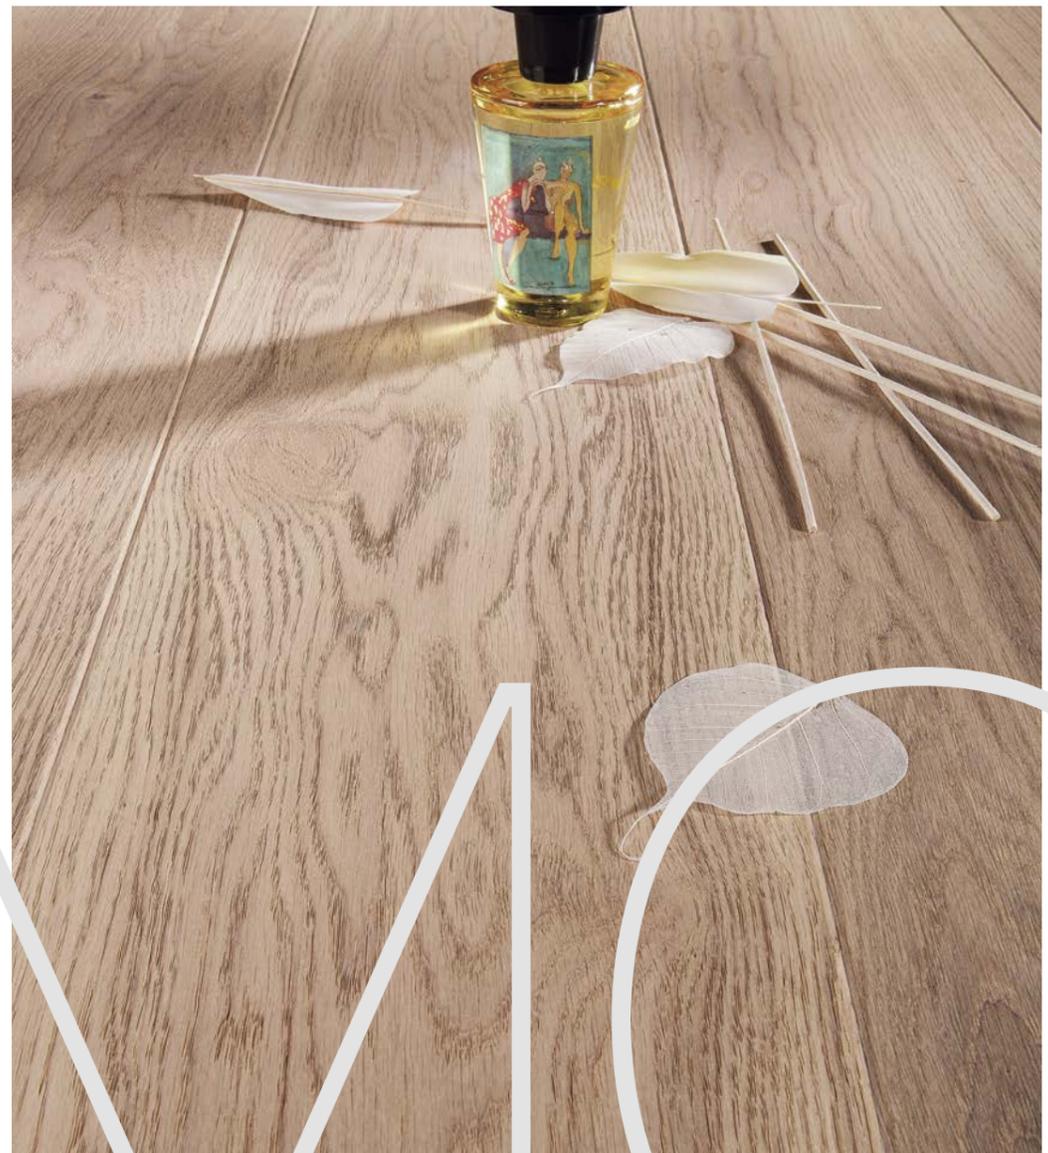

The interior presents a design classic in a modern incarnation. An enormous advantage are the high windows, which illuminate the room. Small accessories and the open-work lamps arranged in an unexpected way stress the exceptional nature of the arrangement.

HARMONY

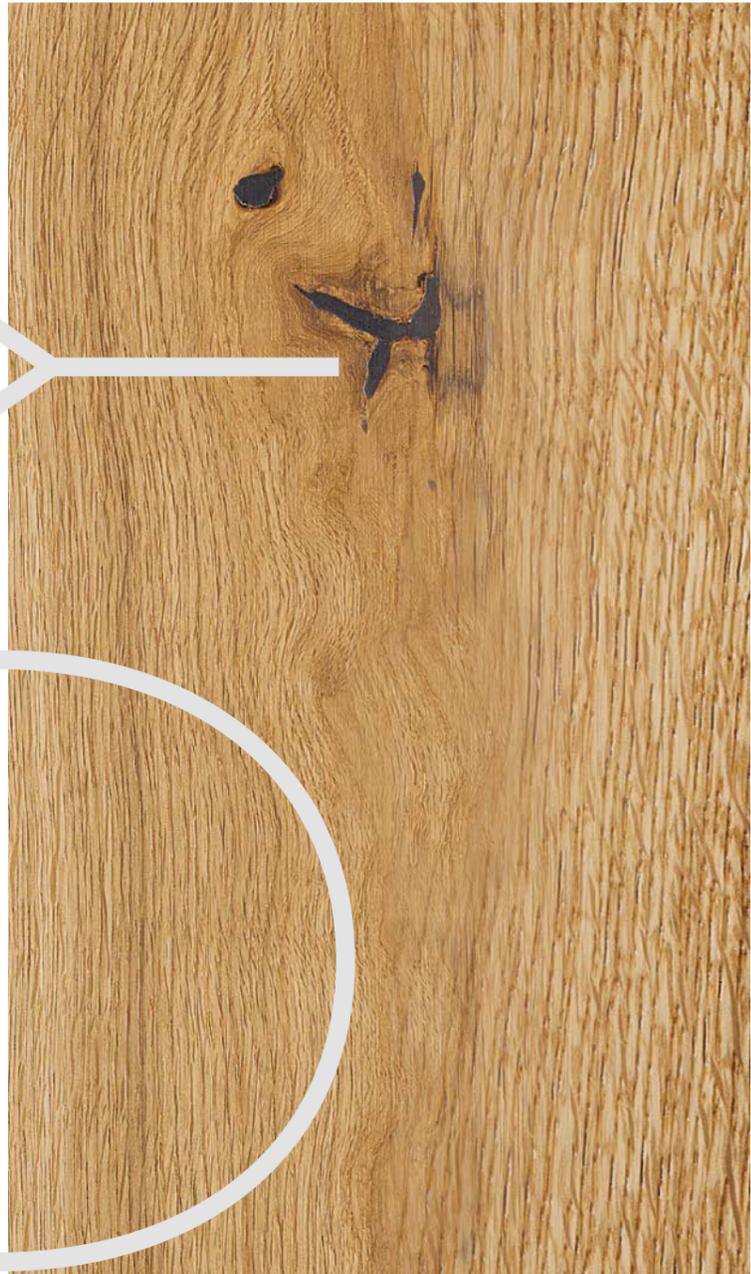

P6101342A – HARMONY Oak skirting board

HARMONY

Classic armchairs with finishing in fine material, a decorative crystal chandelier and antique columns make an interior more luxurious and timeless elegant. Walls in subtle colours and adorned with stuccowork create just the right background to display the qualities of the JOY wood boards' non-standard size and natural colour.

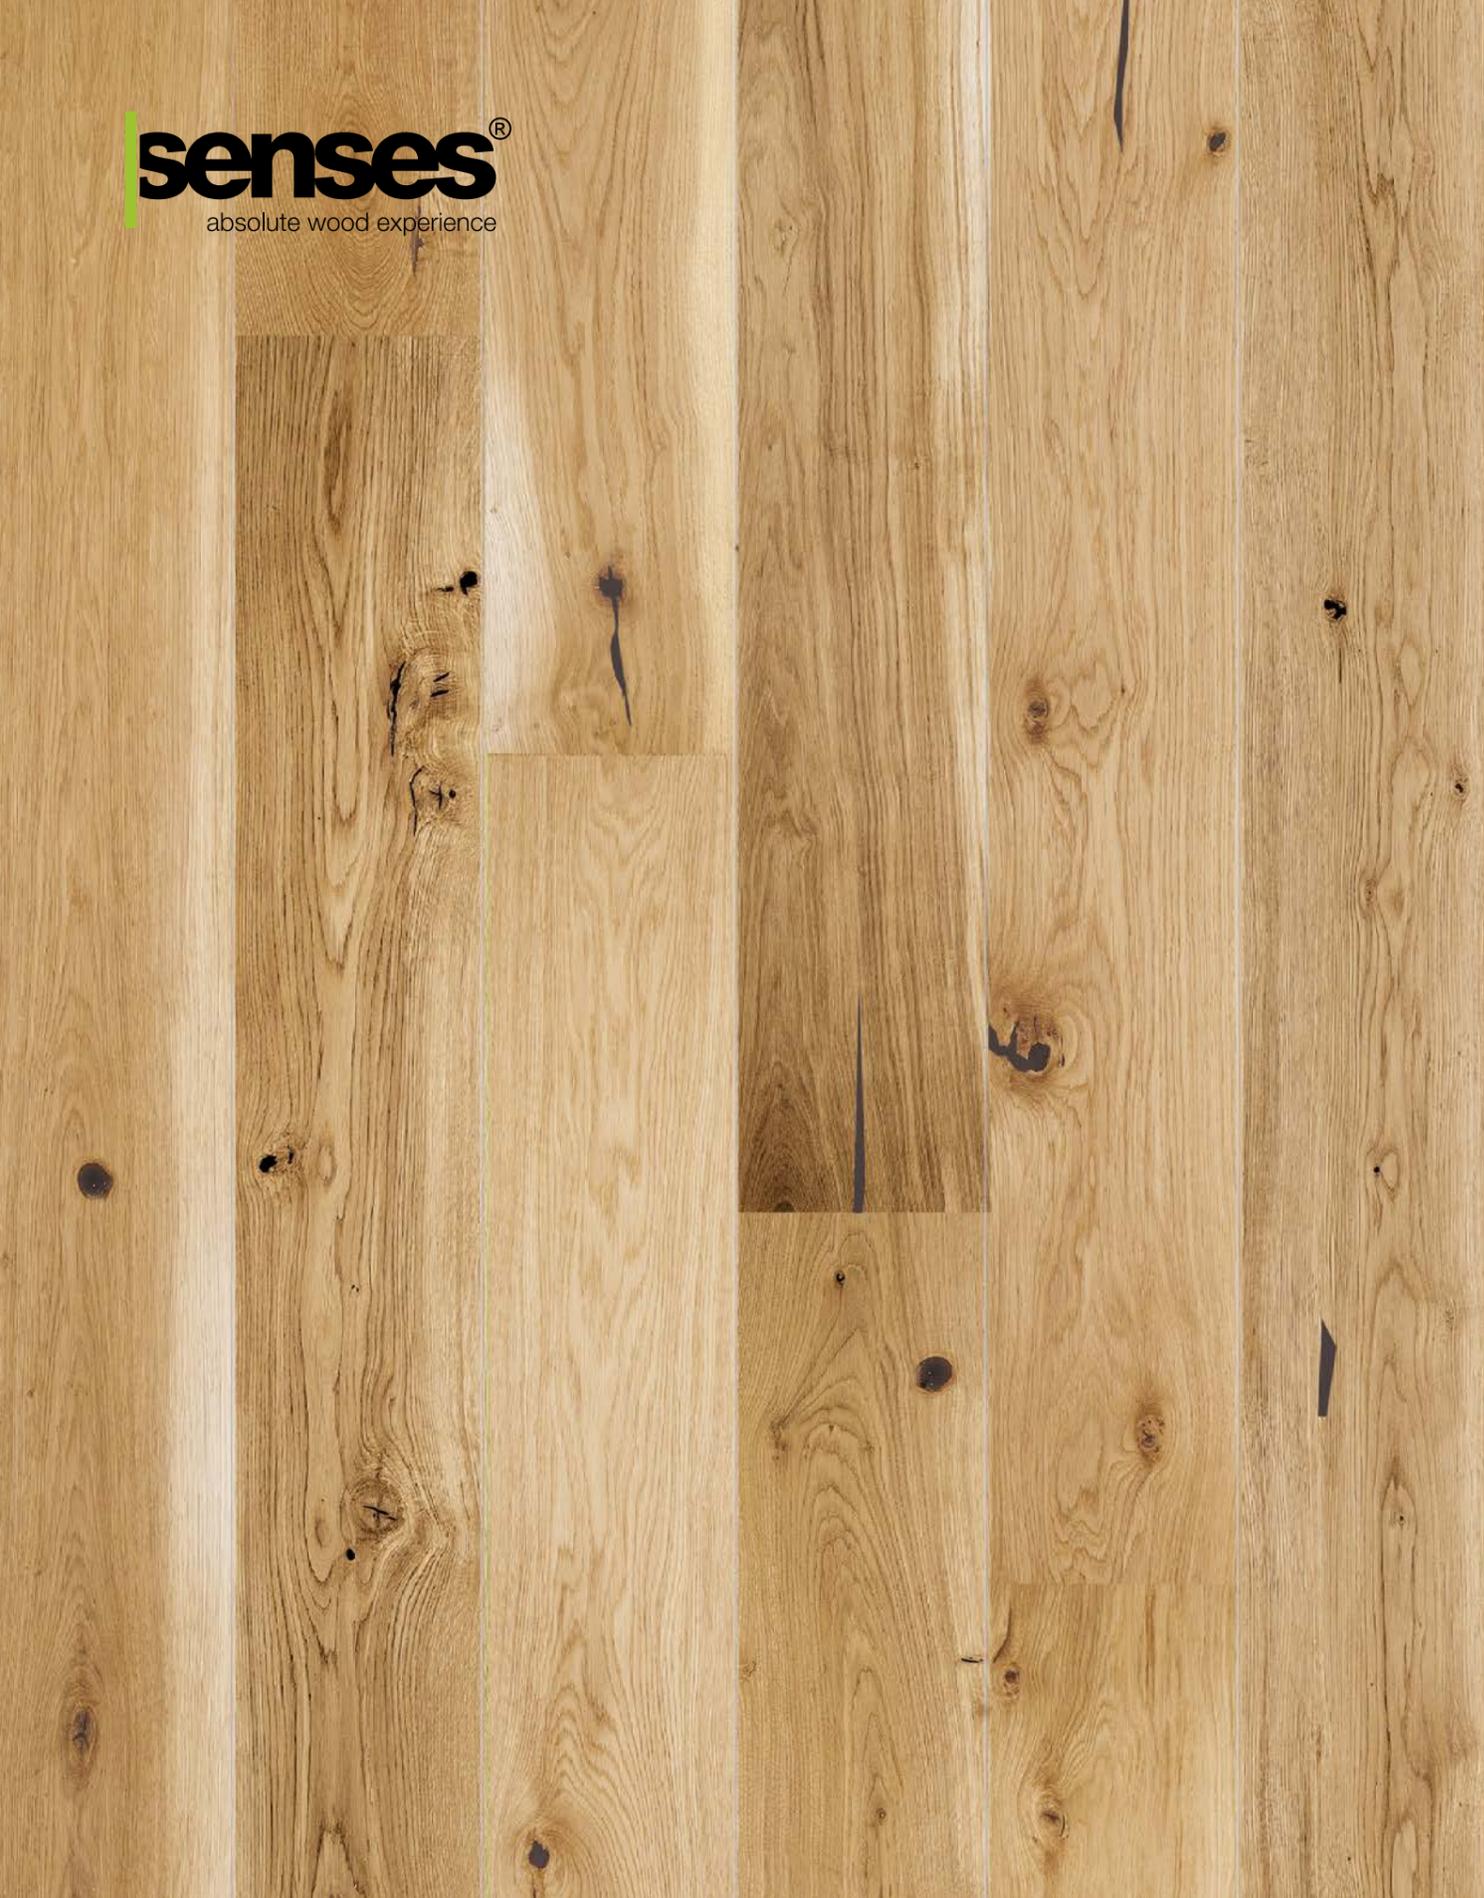

The application of rich profiling combined with taupe has provided an extraordinary effect. A colonial touch is given by the horizontal wooden blinds and stylized furniture from various corners of the world. Long thick, curtains accentuate the height of the room.

JOY

The interior of a barn has been adapted to the modern style. The sophisticated glass panes and the minimalist kitchen furnishings are combined with rustic elements. A weathered table is the heart of the interior, and the entire arrangement is made complete by the distinctive wood pattern of the INTENSE floor.

INTENSE

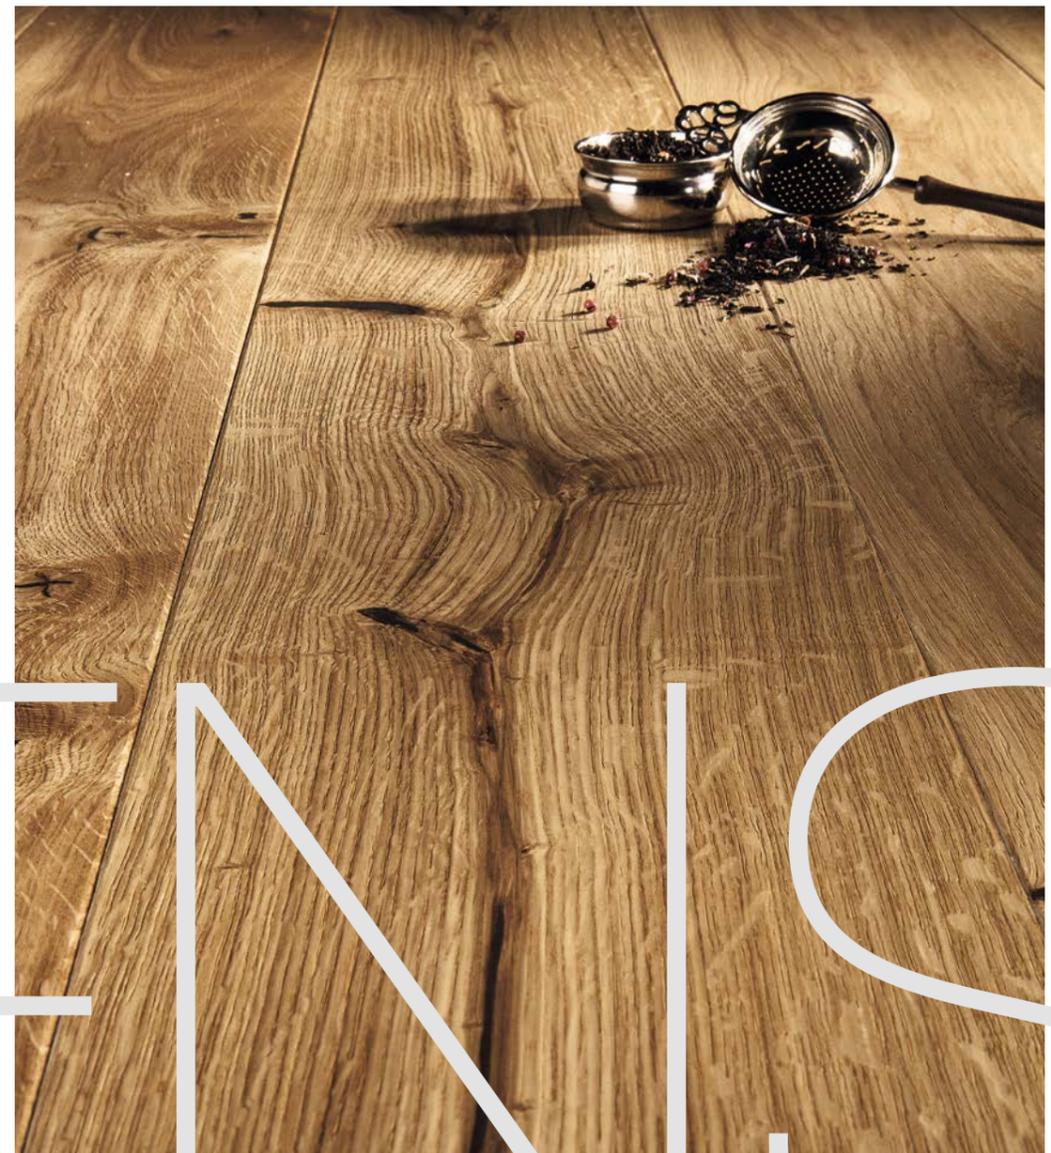

The uniqueness of this design relies largely on the original structural elements the beams and the bricks. Comfortable sofas and village-style decorations make the interior even cosier. The large amount of natural light enhances the rustic character of the natural pattern of the INTENSE flooring.

INTENSE

P6101011A – Oak lacquer skirting board

INTENSE

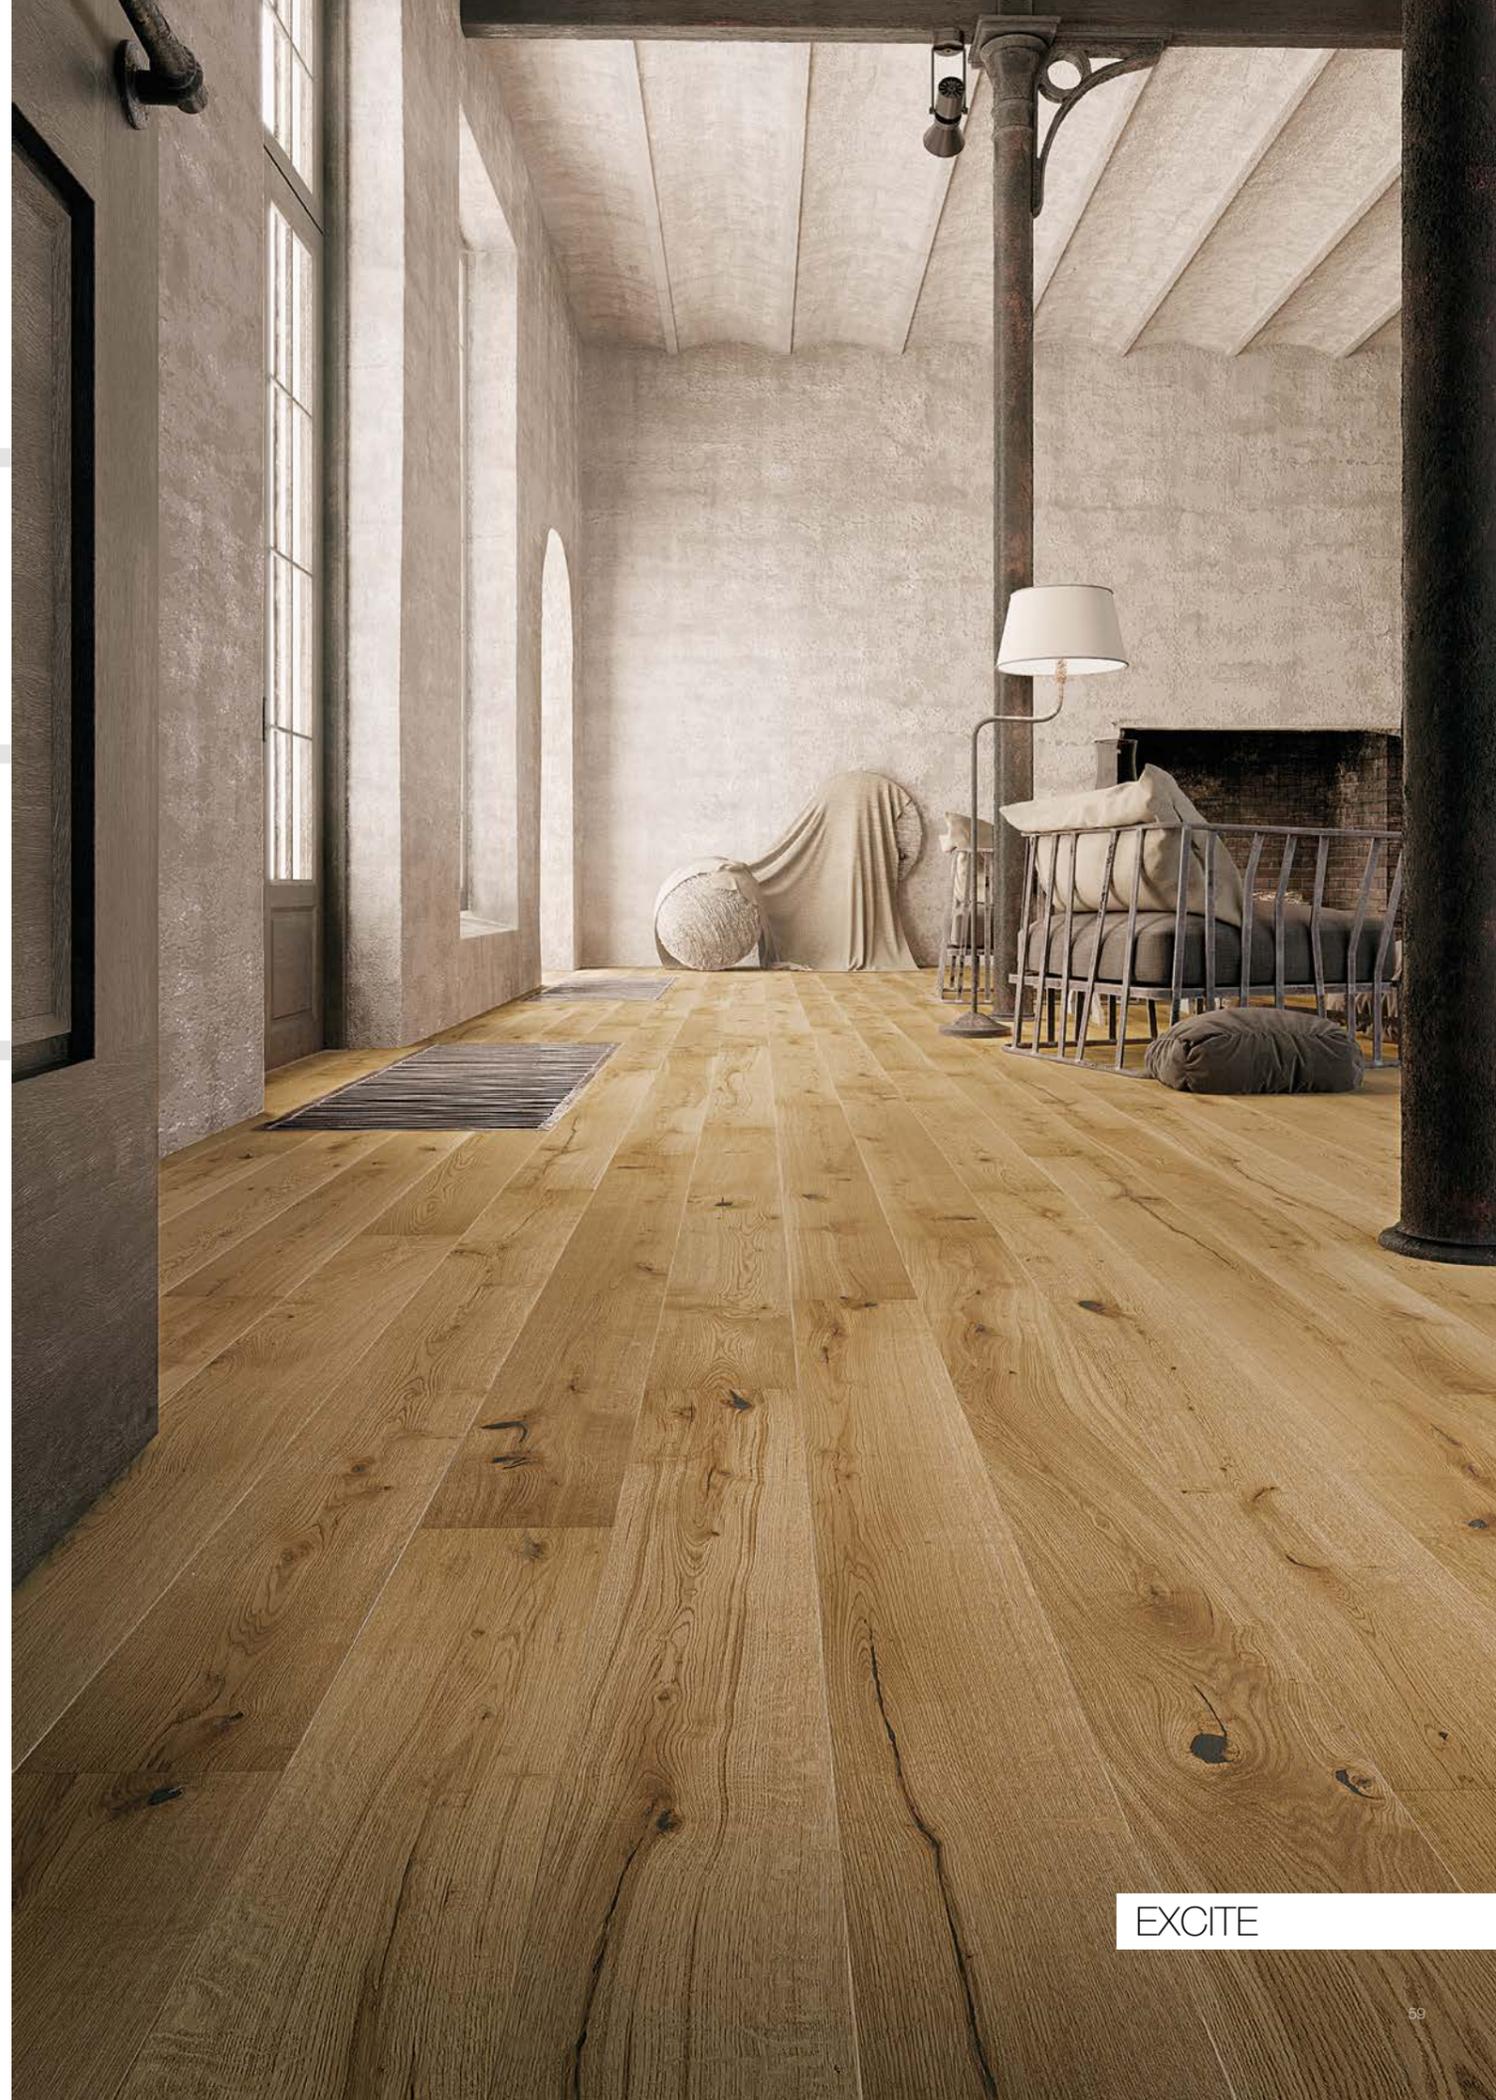

An exceptionally stylish arrangement in a Scandinavian style. The fireplace warms the interior, and the minimal amount of furniture and accessories with simple forms intensifies the impression of spaciousness. The leading role in the interior is played by the EXCITE oak floor, whose distinct pattern determines the atmosphere of the room.

EXCITE

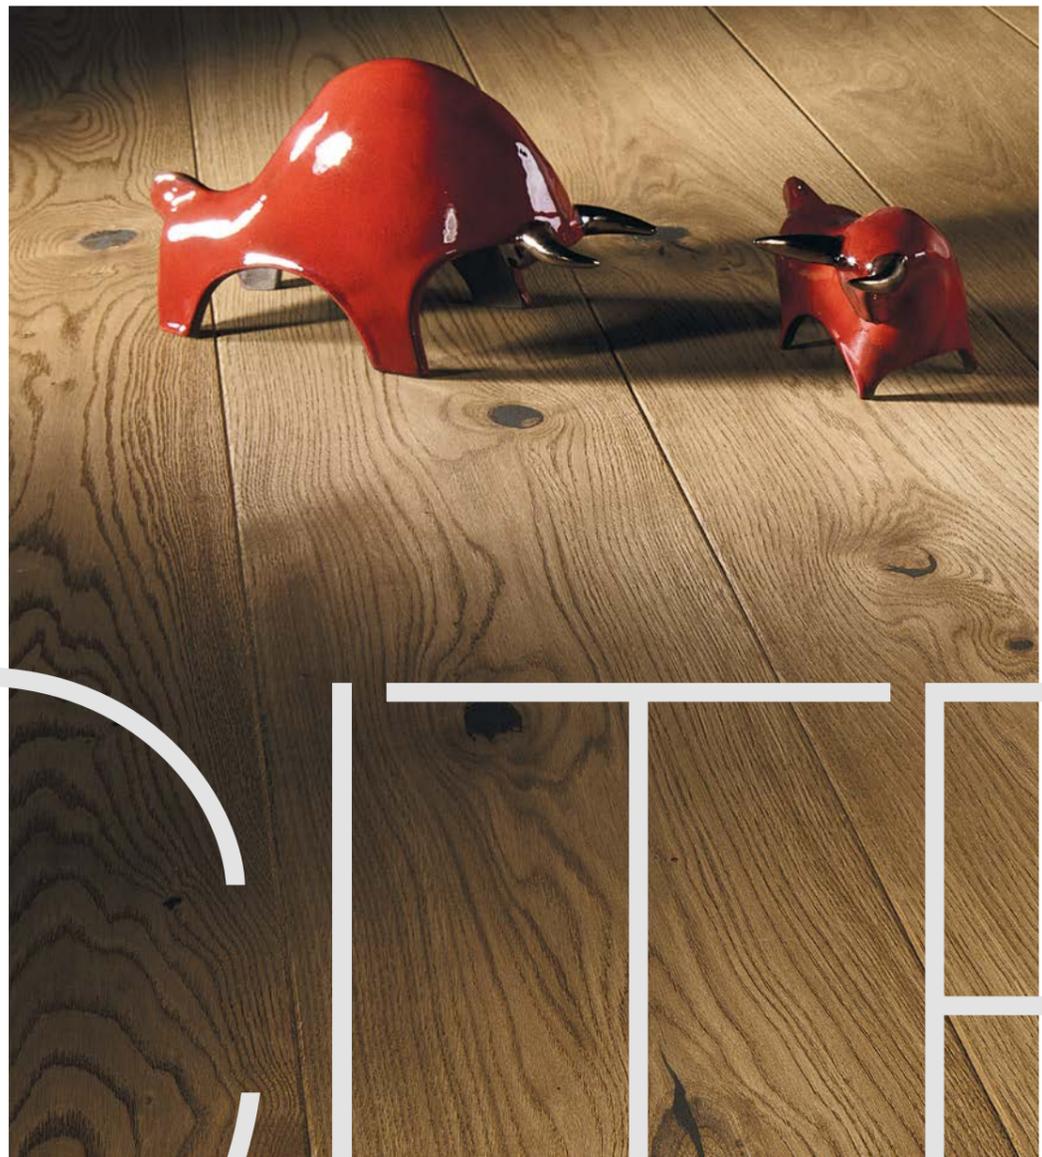

An unconventional effect achieved by minimized decorating. The rawness of the smeared plaster and cast iron columns supporting the ceiling has been broken up with elements which add warmth to the interior – a fireplace, cosy armchair and perfectly matched wood floor.

EXCITE

P6101302A – EXCITE Oak lacquer skirting board

As classic as it can be! Impressive mouldings on the walls, a decorative fireplace, and Renaissance balcony windows. The composition is rounded off by decorative elements - marble tables and brass accessories. The pastel colour scheme is started by the honey brown of the STILL floor.

STILL

The classic enfilade interior of this apartment has been supplemented with extravagant furniture and accessories to make this design eclectic. The minimalist luminaire is a wayward match for the ornamental stuccowork. The floor has the same unconventional design, using elegant, long, STILL planks.

Senses on a wall

A subdued, cosy and warm interior, with designer features giving an original way to display the natural beauty of wood. A variety of wood types, finishes and boardwidths are available.

A floor is not enough

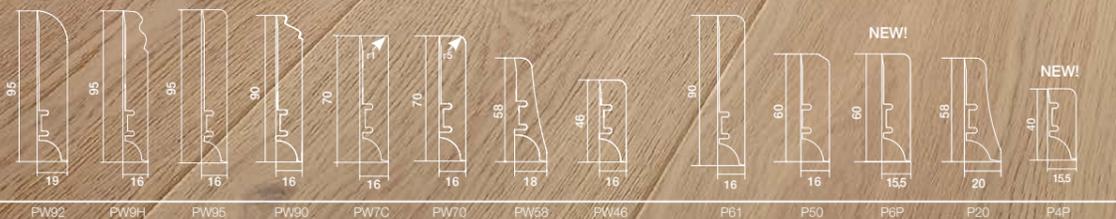

Natural materials rule in interior design, with wood supreme among them. On the one hand, new uses are being found for it, whilst being applied alongside more traditional uses that have been around for centuries.

... now you can fit Senses boards on the wall too!

White skirtings

The Elite series is a prestigious collection of white coated natural wooden skirting boards. These are perfectly suited to any kind of floor. White skirtings boards are recommended for any type of floor. The length of each skirting board is 2200 mm.
